

# All-terrain, military special vehicle manufacturing plant

## Advanced products developed by strategic cooperation member units

The company's technical team has more than 30 years of experience in the design and manufacture of special vehicles, with profound technical accumulation, the company has a complete design-production-testing-data calibration manufacturing process route, focusing on the development and production of wheeled military vehicle chassis assemblies. The business covers police, anti-terrorism and anti-riot, dual-use, high-end residential vehicles.

The products are used in the fields of national defense, aerospace and petroleum exploration, and the astronauts and the return capsule search and rescue vehicle of Shenzhou 7 are its classic products.

The products are sold to the Middle East, Africa, Southeast Asia, Central Asia and other countries.

### <<<整车系列

12x12 off-highway transport vehicles

6x6 fast assault mine protection vehicle

8x8 amphibious vehicles

8x8 desert transporter

6x6 fast assault vehicle

6x6 pickup truck

4x4 independent core-trailer truck chassis

4x4 individual combat vehicles

### <<<车桥系列>>>

25-ton axle

1300 series independently suspended front axle 1300 series independently suspended middle and rear axles

1300 Series Independent Suspension Front and Center Bridge

3000 series independently suspended front axle

3500 series independently suspended rear axle 3500 Series Non-Independent Suspension Center Bridge

3500 Series Non-Independent Suspension Middle and Rear Axles

### <<<零部件系列>>>

4x4 7-9T front and rear axle final drive assy with differential lock

High-speed full-time four-hour transfer w-BFD700

6x6 8x8 7-9T Thru Axle Final Reducer Assy (with Inter-axle Differential Lock and Inter-axle Differential Lock)

6x6 8x8 13-16T Thru-axle Final Reducer Assy with Inter-Axle Differential Lock and Inter-Axle Differential Lock

Light and medium cage half-shaft assemblies
